

Appendix To Distributional National Accounts Guidelines

This document describes the content of the folder “DINA Guidelines Appendix” that accompany the DINA guidelines. The folder contains is divided in three subfolders that relate to three different chapters of the main document:

- “Chapter 2” contains the data used for constructing the tables in chapter 2.
- “Chapter 3” contains the data used for constructing the tables in chapter 3.
- “Chapter 7” contains data and detailed information on the methodologies presented in chapter 7. It is divided into two subfolders:
 - “Combining Lorenz Curves” provide a detailed step-by-step Stata code for combining Lorenz curves as is explained in sections 7.2.3.1 and 7.2.3.2.
 - “Default Parameters” contains data files with the parameters to use by default for certain imputations when no other (more direct) data is available.
