

(last update: 23-05-2016) Read Me – Wealth Simulation MatLab

This directory includes all MatLab-format codes that we use to transform inheritance tax tabulations into g-percentile wealth series:

- **Files gen_gperc.m, etc.:** main computer codes (the codes that we use are gen_gperc_byyear.m)
- **File ReadMeFournier2016.pdf** : file explaining the structure of the codes
- **Directory codes:** includes all subroutines
- **Directory output:** includes all output files (the output that we use is in directory byyear)
- **Directory rawdata** : includes all raw data files (the raw data that we use are in rawdata_byyear.xlsx: sheet RawData and Averages are extracted from Tables C6-C7 of GGP2016WealthAppendixCPart1.xlsx)
