

(last update: 23-05-2016) Read Me – Income Simulation MatLab

This directory includes all MatLab-format codes that we use to transform income tax tabulations into g-percentile income series:

- **Files gen_gperc.m, etc.** : main computer codes (the codes that we use are gen_gperc_bysheet.m and gen_gperc_indiv_bysheet.m)
- **File ReadMeFournier2016.pdf** : file explaining the structure of the codes
- **Directory codes**: includes all subroutines
- **Directory output**: includes all output files (the output that we use is in directories bysheet and indiv_bysheet)
- **Directory rawdata** : includes all raw data files (the raw data that we use are in rawdata_bysheet.xlsx and rawdata_indiv_bysheet.xlsx: both xlsx files are extracted directly from IncomeTaxTabulations/GGP2016IncomeTaxTabulations.xlsx)
